

BPTC Key Statistics 2017

An analysis of students over three academic years

Introduction to the BPTC Key Statistics report

This report provides key statistics relating to students enrolled on the Bar Professional Training Course (BPTC), which is the vocational stage of training for the Bar. The BPTC is delivered at a number of universities across England and Wales, and the data in this report reflects data submitted to the Bar Standards Board by these BPTC providers as at January 2017. We were also assisted in the development of this report by BPTC students, BPTC graduates, careers advisers and providers, amongst others.

The BPTC is delivered in a range of ways:

- full-time over one academic year or part-time over two academic years;
- as a stand-alone qualification or as an extension to a qualifying law degree (as offered by the University of Northumbria at Newcastle).

You can find more details about the BPTC on our [web site](#).

Following on from publication of the first edition of this report (BPTC Key Statistics Report 2015) on 30 November 2015, several changes have been made, to reflect feedback received from various users of the data and to provide more informative statistics on BPTC student attainment, as well as the progression of BPTC graduates onto pupillage following the BPTC. An outline of changes made to the report can be found on page iii.

This report is divided into four parts:

- Part 1** Key statistics aggregated for all providers (full-time and part-time BPTC students);
- Part 2** Key statistics by provider (full-time BPTC students);
- Part 3** Key statistics by provider (part-time BPTC students);
- Part 4** BPTC graduate progression statistics - both aggregated and by provider (full-time and part-time BPTC students).

The BPTC cohorts included in Parts 1-3 are as follows:

- 2013/14, 2014/15, 2015/16 full-time students;
- 2013/15, 2014/16, 2015/17 part-time students, with data on student demographics only for those in the 2015/17 cohort, as results are not yet available for this cohort.

In Part 4 the 2011/12 and 2012/13 full-time and 2011/13 and 2012/14 part-time cohorts are also included in order to give a more detailed picture of statistics on pupillage for those who have graduated from the BPTC.

Important notes regarding data use and interpretation

Please take into consideration the difficulty in comparing data between years; as the data were taken at different points in time and this affects the proportion of students that have not yet completed the BPTC and the relative proportions of those achieving each overall grade, withdrawing from, or failing the BPTC.

It should also be noted that is worthwhile to refer to the x-axis of the charts representing student numbers in order to get a better context of the size of the population being represented.

Please also take into consideration the difficulty in drawing inferences from these data, as there are many factors involved in determining student success on the BPTC as well as progression onto first six pupillage following completion of the course.

Changes in this edition

In this edition, we have decided not to include in any charts on student outcomes (Parts 1A, 2A, 3A, 4A and 4B), instances where there are fewer than 20 students in each overall cohort. For example, if the number of students from a certain provider with a first class degree is fewer than 20, they have not been included in the relevant chart, and a footnote highlighting what has been taken out is provided underneath the affected chart. This is consistent with the Higher Education Statistics Agency (HESA) [Standard Rounding Methodology](#) for the anonymisation of statistics.

This is to ensure greater validity in the data presented, as smaller cohorts are more likely to be affected by outliers in terms of student outcomes and can result in misinterpretation of the data. For example, with a cohort of ten, each individual student represents 10% of all outcomes, whereas with a cohort of 20, each individual student represents 5% of all outcomes. This allows for more noise within the data in terms of student outcomes and greater confidence that the results provided are more reflective of the providers than they are of randomness in student outcomes.

This change means that in many cases, data on individual providers are not found in a chart. Anonymised data for every chart, including providers taken out owing to small cohort sizes, can be found in the appendices.

Data presentation

The data in the main body of the report (parts 1-4) are presented in charts with most measures indicating both numbers and percentages of BPTC students. Providing both helps to illustrate population size and give greater context to the percentages displayed.

The raw data can be found in the appendices in an anonymised form, in compliance with the anonymisation code of practice outlined below. In the appendices, where we do not have data (either because the provider did not collect the data or the student did not provide the data) we have used the

words “Not provided”. However, in the charts, we have not represented instances where data were not provided, as including it would lead to greater difficulty in making direct comparisons between groups.

In this report “Not yet complete” means the student has either not taken all the assessments, not passed all the assessments, deferred one or more assessments to a future year, or been permitted to suspend their studies and resume at a specified point. Students who have withdrawn from the course have not completed all the assessments and therefore have no overall grade; in some cases, these students may re-enrol. A student who has failed the BPTC may re-enrol to take the course again.

In cases where charts relate to students domiciled in the UK/EU or overseas only, this refers to the region in which the student was domiciled prior to enrolment on the BPTC. The domicile codes used in the aggregation of the data are taken from the Higher Education Statistics Agency (HESA). The terminology used in chart titles regarding domicile is as follows:

- UK/EU domiciled students;
- Overseas domiciled students;
- Students from all domiciles.

Data sources

The data in the report were collected from:

- individual BPTC providers;
- the BPTC online applications systems Milkround (in use up to and including 2014 admissions) and BarSAS (the current system), and
- pupillage registration data from our secure core database.

Validation has been carried out on returned data based on comparisons against data already held by the Bar Standards Board and by asking BPTC providers to verify the information that was provided.

We have taken considerable care and attention in the compilation of the data provided to us and we have sought to provide a purely objective presentation of the data. Missing data and/or new information received may affect the representation of the data presented in this report and efforts will be made to incorporate any such data in future reports. Despite our best efforts and quality control procedures, mistakes can happen. When they do, corrections will be made in a timely manner, announced and clearly explained to users.

Data protection and confidentiality

We take our responsibilities for data protection very seriously and have made every attempt to make sure that individual students cannot be identified from the data included in this publication. We have adhered to the *Anonymisation: managing data protection risk code of practice* report from the Information Commissioner's Office, (November 2012) and applied anonymisation techniques where appropriate.

An outline of the anonymisation process is given in Appendix IV.

The data in this report were compiled by staff of the Bar Standards Board. Providers were given the opportunity to validate the data that they had submitted.

Acknowledgements

We are grateful to BPTC providers for their cooperation in providing the majority of data used in this report.

Part 4: BPTC graduate progression statistics: both aggregated and by provider (full-time and part-time BPTC students)

The charts in Part 4 are based on first six pupillages commencing between 1 October 2011 and 31 March 2017 inclusive. Graduates in the cohorts covered by this report who have secured pupillage since 31 March 2017 will be included in the next publication.

Students may start pupillage up to five years after successfully completing the BPTC/Bar Vocational Course (BVC). These charts do not include pupils who either passed the BPTC/BVC prior to 2012 or were exempted, for example by virtue of having passed the Bar Transfer Test.

Full details of overall pupillage rates (including those who took alternative routes to pupillage) can be found at:

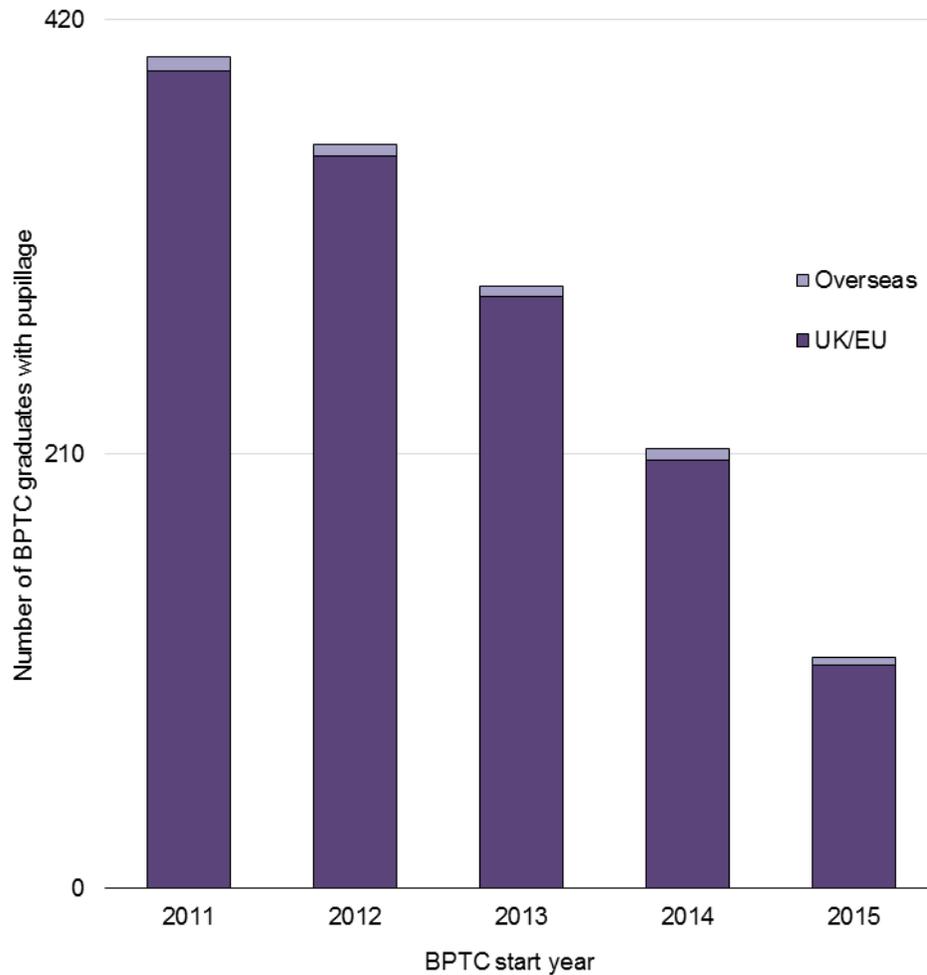

<https://www.barstandardsboard.org.uk/media-centre/research-and-statistics/statistics/pupillage-statistics/>

Not all students taking the BPTC will wish to undertake pupillage, or wish to remain domiciled in the UK. There are relatively few overseas domiciled BPTC graduates that have gained pupillage in the UK following completion of the course, and for this reason, the majority of the charts in Part 4 contain data on UK/EU domiciled BPTC graduates only. Of the BPTC graduates enrolling in the academic years commencing 2011-2015, 28 overseas domiciled BPTC graduates gained first six pupillage in comparison to 1350 UK/EU domiciled BPTC graduates.

Appendix IV: Anonymisation process

To protect the identity of individual students, data have been anonymised in line with recommendations and guidelines laid out in 'Anonymisation: managing data protection risk code of practice' (Information Commissioner's Office, November 2012).

A combination of the following anonymisation techniques have been carried out in order to prevent single individuals being identified from the data in the charts:

- y-axes in all instances only contain three values, in order to make it more difficult to ascertain student numbers and percentages for each chart element;
- some of the data have been aggregated, particularly sensitive demographic data and instances of small cohorts;
- as part-time cohorts are significantly smaller than full-time cohorts the number of charts have been cut down significantly and data tables have not been provided;
- by anonymising the data in parts 1-3, we have been able to leave some of the data intact in part 4 (the anonymisation of demographic data in the earlier parts of the report means that it is not possible to identify individuals in part 4 with any degree of accuracy);
- in the data tables found in the appendices, values have been banded automatically if they are fewer than 5 (< 5 is displayed), and fewer than 10 (< 10 is displayed);
- in a column, if only one value fewer than five or fewer than ten is present, then the next lowest value is banded to the next multiple of five, e.g. 110 becomes < 115, and 21 becomes < 25;
- totals in the data tables are not provided in most cases, particularly for individual providers;
- percentages are not provided in the data tables.

We have decided not to include in any graphs on student outcomes (Parts 1A, 2A, 3A, 4A and 4B) in instances where there are fewer than 20 students in each overall cohort. For example, if the number of students from a certain provider with a first class degree is fewer than 20, it has not been included in the relevant chart.

This is to ensure greater validity in the data presented, as smaller cohorts are more likely to be affected by outliers in terms of student outcomes and can lead to misinterpretation of the data. This means that in many cases, data on individual providers are not found in a chart.
