BPTC Key Statistics 2011-2014

An analysis of students over three academic years

Introduction to the BPTC Key Statistics report

This report provides key statistics relating to students enrolled on the Bar Professional Training Course (BPTC) in each of the academic years starting September 2011, 2012 and 2013 which covers the following cohorts: 2011-12 full-time (FT), 2012-13 full-time, 2013-14 full-time, 2011-13 part-time (PT) and 2012-14 part-time. This report reflects data as submitted to the Bar Standards Board by the relevant BPTC providers as at summer 2015.

The BPTC is delivered in a range of ways:

- full-time over one academic year or part-time over two academic years;
- as a stand-alone qualification or as an extension to a qualifying law degree (as offered by the University of Northumbria at Newcastle).

We were assisted in the preparation of this report by BPTC students, BPTC graduates, careers advisers and providers, amongst others.

You can find more details about the BPTC on our web site:

<https://www.barstandardsboard.org.uk/qualifying-as-a-barrister/bar-professional-training-course/how-to-apply-for-the-bptc/>

This report is divided into four parts:

- Part 1** Key statistics aggregated for all providers (full-time and part-time BPTC students);
- Part 2** Key statistics by provider (full-time BPTC students);
- Part 3** Key statistics by provider (part-time BPTC students);
- Part 4** BPTC graduate progression statistics - both aggregated and by provider (full-time and part-time BPTC students).

Data sources

The data in the report has been collected from:

- individual BPTC providers;
- the BPTC online applications system (Milkround) in use up to and including 2014 admissions;
- pupillage registration data from our secure core database.

Validation has been carried out on returned data based on comparisons against data already held by the Bar Standards Board and by asking BPTC providers to verify the information that was provided.

We have given considerable care and attention in the compilation of the data provided to us and we have remained objective in the presentation of this data. Missing data and/or new information received may affect the representation of the data that is presented in this report and efforts will be made to incorporate the relevant data in future reports.

Despite our best efforts and quality control procedures, mistakes can happen. When they do, corrections will be made in a timely manner, announced and clearly explained to users.

Data presentation

The data in the main body of the report (parts 1-4) is presented in charts with most measures indicating both numbers and percentages of BPTC students. Providing both helps to illustrate population size in instances where there is a relatively small cohort for the sub-category presented.

The raw data can be found at the end of the report in an anonymised form, in compliance with the anonymisation code of practice outlined below. Where we do not have data (either because the provider did not collect the data or the student did not provide the data) we have used the words “Not provided”.

In this report; 'Not yet complete' means the student has either not taken all the assessments, not passed all the assessments, deferred one or more assessments to a future year, or been permitted to suspend their studies and resume at a specified point. Students who have withdrawn from the course have not completed all the assessments and therefore have no overall grade; in some cases, these students may re-enrol. A student who has failed the BPTC once may re-enrol to take the course again.

Data protection and confidentiality

We take our responsibilities for data protection very seriously and have made every attempt to make sure that individual students cannot be identified from the data included in this publication. We have adhered to the *Anonymisation: managing data protection risk code of practice report* from the Information Commissioner's Office, (November 2012) and applied anonymisation techniques where appropriate.

An outline of the anonymisation process is given in Appendix IV.

The data has been compiled by members of our Education and Training department, with the content of the report discussed and agreed by the BPTC subcommittee. Providers were given several opportunities to validate the data that they had submitted and provide feedback on the report format.

Acknowledgements

We are grateful to providers for their cooperation in providing the majority of data used in this report. We are also grateful to our retained experts for their valuable insight and contributions.

Neither do they include individuals who gained pupillage following completion of the Bar Transfer Test.

Full details of overall pupillage rates can be found at:

Not all students taking the BPTC will wish to undertake pupillage, or wish to remain domiciled in the UK. The charts should be read within this context.

Full details of pupillage are contained in the Pupillage Handbook:

Appendix IV: Anonymisation process

To protect the identity of individual students, data has been anonymised in line with recommendations and guidelines laid out in 'Anonymisation: managing data protection risk code of practice' (Information Commissioner's Office, November 2012).

A combination of the following anonymisation techniques have been carried out in order to prevent single individuals being identified from the data in the charts:

- in charts showing student numbers (ie non- percentage charts) , any value from 1-4 has been automatically assigned a value of three;
- y-axes in all instances only contain three values, in order to make it more difficult to ascertain student numbers and percentages for each chart element;
- some of the data has been aggregated, particularly sensitive demographic data and instances of small cohorts;
- as part-time cohorts are significantly smaller than full-time cohorts the number of charts have been cut down significantly and data tables have not been provided;
- by anonymising the data in parts 1-3, we have been able to leave some of the data intact in part 4 (the anonymisation of demographic data in the earlier parts means that it is not easy to identify individuals in part 4 with any degree of accuracy);
- in the data tables found in the appendices, values have been banded automatically if they are less than 5 (< 5 is displayed), and less than 10 (< 10 is displayed);
- in a column, if only one value less than five or less than ten is present, then the next lowest value is banded to the next multiple of five, e.g. 110 becomes < 115, and 21 becomes < 25;
- totals in the data tables are not provided in most cases, particularly for individual providers;
- percentages are not provided in the data tables.
